About us

About us

We are a software development agency based in Austin, TX & Ahmedabad, IN. We work remotely, offering various software services (including web design, web / mobile development and document assembly) and specializing in FinTech, SportsTech & LegalTech.
MobileFirst started in 2014, we are 70+ strong & growing rapidly.

Try Pitch

What we do with DocAssemble

01 DOCUMENT AUTOMATION + INTERVIEWS

We work with clients who are in LegalTech, InsureTech & FinTech for building Document Assembly & Automation systems.

02 API + SDKS

We work with different APIs like Plaid, Rutter, DocuSign, Airtable and Zapier to build various integrations.

03 ARTIFICIAL INTELLIGENCE

We deliver the data from documents to ethical AI & LLM solutions. This helps our clients build bespoke & secure solutions for them.

04 NLP, OCR & TESSERACT

We work with different document scanning solutions like Tesseract, DocumentAI to get the OCR data from the document. We additionally can do NLP operations.

05 MUTLI-LINGUAL

We are able to build multi-lingual systems for different user groups. Document templates in different languages are possible.

06 WORKFLOW MANAGEMENT

We build various workflows which can be integrated from landing form, and lead gen forms to payment forms. These help clients save time & resources.

What we do at MobileFirst / Fintegration

01 WEB, MOBILE & CLOUD APPLICATIONS

We have worked on more than 200+ web, mobile & cloud applications using Node, React, Flutter, iOS, AWS, Angular and other frameworks.

02 TEAM AUGMENTATION & STAFFING

We have built scalable & flexilbe teams to help scale startups & scaleups. Companies like Leap Digital, Flipkart, NFL/NHL teams depend on our software developers.

03 FINTECH INTEGRATIONS

We build Fintech Applications & Integrations with API Partners like Plaid, Salt Edge, Rutter, Codat etc. Solutions in invoice financing, lending, Neo-bank etc.

04 BLOCKCHAIN

We have built white-label NFT solutions, marketplaces, and fractional asset management solutions. Our partners include Polygon, Flow, Near & Avalanche.

05 CLOUD MIGRATION

We have certified developers with AWS, GCP and Azure. Our expert team with Java & .NET are able to provide enterprise-grade solutions to clients.

06 PROJECT, TIME & RESOURCE

We work on time & project-based pricing models. For team augmentation, we have a resource-based pricing on a flexible monthly model.
